

**MYIELD**

# MY FX3I

MY FX3I is a comprehensive seed treatment formulation engineered for the progressive grower who demands pinnacle emergence, uniform stands and outsized yields. Each component in this premium blend has been hand-selected to deliver unsurpassed seed protection, greater overall plant health and vigor and a seamless user experience. We know our growers demand peak performance from the seed treater to the field. MY FX3I delivers it.

### WHAT DOES IT PROTECT AGAINST?

MY FX3I provides broad spectrum protection against:

- Pythium
- Phytophthora (early season)
- Rhizoctonia
- Fusarium (seed and soil-borne)
- Seed-borne Sclerotinia, Botrytis and Phomopsis
- Aspergillus and Penicillium general seed rots
- Early season insects, including bean leaf beetles, early season aphids and maggots

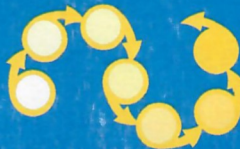

### HOW DOES IT PROTECT?

MY FX3I provides unparalleled contact and systemic protection during critical early-growth stages.

### HOW DOES IT HANDLE?

Smooth. In seed treatment, performance starts in the treater. We understand that at My Yield. That's why we only use the best performing polymers and highest quality colors. By using only the best ingredients, MY FX3I ensures the highest seed flowability for growers--from the treater to the tender to the planter to the field.

### BUT DON'T TAKE OUR WORD FOR IT. HERE'S WHAT OUR GROWERS ARE SAYING . . .

"The My Yield beans had early vigor and great health and color. It was obvious against the other treatments we used."

- **ALLAN H. IOWA GROWER**

"Our goal in going with My Yield was to use quality treatment and plant less beans. We saw a significant difference in stand counts across various ground types and situations. It was clear the quality of treatment was way better than what we had been using in the past. So that with how easy the system was to use, I'm very happy."

- **JONATHAN E. INDIANA GROWER**

"We planted in some horribly cold and wet conditions last season with little to no expectation that the beans were going to come up and they actually did!"

- **GARY G. MICHIGAN GROWER**

"My Yield was as good or better than any other treatment we got from our dealers in the past."

- **TYSON D. ILLINOIS GROWER**

"When we had others treat our beans in the past, we ran into issues with flowability and chunks. None of that happened with My Yield. And now we are no longer limited in where we can source our beans from."

- **TRAVIS S. IOWA GROWER**
